Adware.180Solutions.Zango Spyware Remove

PREVX™ Australia "Leading the Pack for Malware Protection and Cleanup"

Adware.180Solutions.Zango

Determination: **Bad**

Adware.180Solutions.Zango has been determined by the Prevx database as Bad. Therefore this file is unsafe to run and should be removed using Prevx.

We Recommend you do not delete the files listed above manually. As Malware can use the same name as a genuine file, you could inadvertantly delete a file which is genuine. Prevx can analyze the actual malware file on your computer so it can identify and clean up malware and protect your computer from future malware infections.

It's very easy to remove these infections just click the button below to download and run Prevx

Download Prevx

PC TECHWORLD Webuser COMPUTERWORLD

ZANGOINSTALLER.EXE

AUTOMATED MALWARE PROFILE, ANALYSIS, REMOVAL AND SIGNATURE INFORMATION:

DEFINITION OF: ZANGOINSTALLER.EXE

Safety Rating: Known Adware, do not run

Adware Family: Part of Adware group - Adware.180Solutions.Zango

Malware Form: EXPLOIT

Protection: Prevx is a very powerful PC security product, it will protect, disinfect, cleanup and remove ZANGOINSTALLER.EXE and safeguard your PC against viruses, trojans, worms, spyware, rootkits and adware

New Users: You can download the full Prevx product and use it to cleanup and remove ZANGOINSTALLER.EXE and other infections free of charge, then leave it to monitor your PC for other infections

READ ARTICLE PRINT FEEDBACK EMAIL BLOG

marketWIRE

CLEARWATER, FL -- (MARKET WIRE) -- 05/02/07 -- Sunbelt Software, a leading provider of Windows security software, today announced the top ten most prevalent spyware threats for the month of April. The results are based on monthly scans performed by Sunbelt's award-winning antispyware product, CounterSpy(TM).

The top ten most prevalent spyware threats for the month of April are:

1	Trojan-Downloader.Zlob.Media-Codec	1.68%
2	Virtumonde	1.59%
3	Trojan.FakeAlert	1.16%
4	ClickSpring.PuritySCAN	0.61%
5	Malware-Stopper	0.52%
6	Trojan.Unclassified.gen	0.38%
7	Trojan-Downloader.Win32.ConHook	0.30%
8	180solutions.SearchAssistant	0.30%
9	Trojan.Smitfraud	0.28%
10	SpyLocked	0.26%

Trojan-Downloader.Zlob.Media-Codec

Trojan-Downloader.Zlob.Media-Codec is a trojan that installs rogue security software on the infected machine without notice and consent. It purports to be a needed codec or upgrade to Windows Media Player when users attempt to watch certain adult/porn videos to trick the user into downloading it. Once downloaded, it contacts remote servers and initiates the download of rogue security software such as SpywareQuake.

Adware.ZangoSearch

Printer Friendly Page

SUMMARY | TECHNICAL DETAILS | REMOVAL

Updated: February 13, 2007 11:43:42 AM
Type: Adware
Version: 6.8.196.0/6.9.95.0
Publisher: 180solutions inc
Risk Impact: Low
File Names: InstallerShell.exe JadeShadowInstall.exe JadeShadowSetup.exe ZangoInstaller.exe ZangoJadeShado
Systems Affected: Windows 2000, Windows 95, Windows 98, Windows Me, Windows NT, Windows Server 2003, Windows XP

Behavior

Adware.ZangoSearch is an adware program that monitors the contents of Internet browser windows. It opens the Web pages of partner sites when certain keywords are detected in Internet search or shopping browser windows. This program also installs files related to Adware.180Solutions.

Symptoms

Your Symantec product detects the files as Adware.ZangoSearch.

Transmission

This program has to be manually installed or installed as part of other Zango applications.

Registry Helper
Clean Your Computer's Registry (SafeApp Software, LLC)
Your computer may have Invalid Entries in system registry
Download Registry Helper now to check your computer
Some Invalid Entries, if present, may cause computer problems such as slow computer performance, slow startup, or error messages in applications.
The problem of slowdowns and error messages can cause you to feel frustrated and annoyed and become dissatisfied using your computer.
If Invalid Entries are present, deletion may be appropriate. Cleaning your registry and returning it closer to a like-new condition may fix your computer problems and give you a faster, more stable computer.
Invalid Entries Detected: 38
Progress:
Scanning: HKEY_CURRENT_USER\Software\Mozilla\Firefox\Version\Current
Simulation. Not actual scan.
To check your computer's registry for Invalid Entries, please do the following:
Click here to download and install Registry Helper -- a utility that was principally engineered by a leading industry expert -- to check your computer's registry. Download is safe and signed using a Verisign® certificate. By downloading Registry Helper, you agree to the End User License Agreement.
When you see a grey download box like the one shown below, click the "Open" button.
Registry Helper will then install and load and show you a list of detected Invalid Entries in your computer's registry -- and tell you how to delete them.
